SUMMARY:

I love learning and building new things. I have been working for almost 8 years now, but it doesn't feel like work; it just feels like playing and getting money for it. I am passionate about technology and proud to be an engineer. For me work is not just a job; it's a lifestyle.

PROFESSIONAL SKILLS:

Languages:

Java, Kotlin, Dart, Javascript, SQL

Technology:

FCM, Firebase, AWS, Amplify

Libraries:

OkHttp, Retrofit, Compose, Dagger2, Room, JUnit

Others:

Android Studio, REST API, Git, CICD, Jenkins, Docker

WORK EXPERIENCE:

Chief Technical Officer

EMI Shield, Gurugram, India—January 2023 – August 2025

- Founded and designed the EMI Shield, an SDK for locking the phone remotely if the customer is unable to pay the EMI. Registered over **90K devices** while ensuring compatibility over a wide range of Android devices.
- Implemented real-time communication using **Google FCM**, resulting in faster and more reliable action delivery. Implemented Custom SMS server for providing **offline support** as a fallback.
- Designed a **multi-modular** architecture that lets me take advantage of **parallel Gradle processing**.
- Implemented real-time **location tracking** functionality to provide consistent accurate location.
- Implemented a **custom Gradle plugin** for automatically building and deploying the app to **Firebase**.
- Built a server for processing **FCM** message and other **server side events**.
- **Integrated Firebase SDK** in both Android and Ktor apps.

Software Engineer II

Cashify, India—May 2021–August 2022

- Built a mobile phone screen **scratch detection SDK**. The SDK was responsible for continuously capturing the target phone image and also maintaining a continuous **socket connection** to it.
 - Implemented **parallel processing** using **Kotlin Flow** and **coroutines** for multiple image processing.
 - **Reduced APK size by 28%** by removing unwanted language fonts and including files in ProGuard.
 - Build an SDK that is responsible for **wiping devices data** such that device data is **unrecoverable**.
 - Worked on **ADB** and **USB serial communication** to send data over to **flutter** desktop app.
-

Android Developer

CropZone, Noida, India—January 2018–March 2019

- Migrated old legacy code to multi-modular and **MVVM architecture** for future scalability.
- Built and integrated a new module in the app from scratch for international trip bookings.
- Built and deployed a **live video streaming** SDK for live one-to-one video streaming using the **RTMP** protocol and **AWS** Media Package Manager.
- Converted static UI to **server-driven UI**, which reduced manual app updates.

Android Developer

CropZone, Noida, India—January 2018–March 2019

- Developed an app for **reposting Instagram videos** featuring auto **link detection** from the clipboard and posting videos using **Android intent**.
- Revamp the UI of the Tutorials link and implement **filter-based search** in the app for better user experience..

PROJECTS:

Code Playground: [GITHUB LINK](#)

Code Playground is a project built for learning and building electronics projects quickly using **block programming** and virtual electronics components. Users can drag and drop blocks to make a program and view live execution of code in **virtual hardware**.

USB Microcontroller: [GITHUB LINK](#)

The USB **microcontroller** is a subset of the playground, which can be connected to the code playground and can be programmed using block programming. This makes a full ecosystem for rapid prototyping with electronics components from software to hardware execution.

Android Boilerplate Wizard: [GITHUB LINK](#)

User can select any branch on this repo to get started with the **boilerplate template**, which saves the time to integrate boilerplate code for libraries such as Dagger, Room, and Hilt.

G-code Automaton: [GITHUB LINK](#)

G-code generator is a utility for bulk **3D printing** models continuously.

It supports configuration using a JSON file and **live monitoring** of printing by using **OctoPrint**.

EDUCATION:

Maharishi dayanand university:

Bachelor of Computer Application

CGPA: **9.2/10**
